Janet C. Long 'Commissioner' [JanetCLong@pinellascounty.org](mailto:JanetCLong@pinellascounty.org)

**cc:d for Notification purposes:**

Pam Bondi Florida Attorney General [pam.bondi@myfloridalegal.com](mailto:pam.bondi@myfloridalegal.com)  
Department of Financial Regulation Division of Risk Management 768.28 [mike.andrews@myfloridacfo.com](mailto:mike.andrews@myfloridacfo.com)  
Sheriff Bob Gualtieri [rgualtieri@pcsonet.com](mailto:rgualtieri@pcsonet.com)

**NOTICE OF 11 16 2013 FIRE, ADDENDUM TO THE 10/4/2013 NOTICE OF INTENT TO FILE CLAIMS RE: BoCC**

11/16/2013: Literally, for the first time in years, there were no cars in the driveway, making it appear, prior to 9:30pm Friday evening, that no one was home. **There has never been any fire of any kind in the entire twelve (12) + years of living here.** The previous owners never mentioned a fire in all the years they lived here, prior.

The shed in the back of the property, behind and left of the 3000 sqf mother-in-law house, oh so mysteriously caught fire. The shed contained a minimum of 6 gas canisters. The fire was well underway and approximately 20 feet high when it was discovered. The fire from the shed and some of the gas canister explosions caused massive trees to catch on fire. The resulting sparks from both the burning shed and the now burning trees were throwing massive sparks onto the roof of the mother-in-law. More gas canister explosions occurred, throwing more massive sparks when the firemen arrived and began putting out the fire. Had the mother-in-law burned, the main house would have burned to the ground as well, along with all the houses in the area. Interestingly enough, those who directly benefit from all arson, crime, accidents, aviation accidents, marine accidents, 'pollution', every 'terrorist' act, casualty, fatality ARE the Pinellas Board of County Commissioners as they have named themselves the named Insured/beneficiary in the Pinellas County insurance policies, for all of the above happenings. It was some insiders in Pinellas County that warned us about the fourth (most recent) death threat scenario, and that the plan was, it would be by fire. It was they that informed us that the County Commissioners, in their supreme arrogance, stupidly believe they surround themselves with like-minded people, who were not utterly and completely disgusted by their money grabbing treasonous acts, forcing poison and such in the water, and a multitude of other various money laundering schemes and outright theft and embezzlement of public funds. That was the downfall. The County insiders bent over backwards to make sure we were forewarned.

There is absolutely no question in my mind whatsoever, who is personally, directly responsible or at its behest, responsible for this fire. And that is why I am enclosing the NOTICE OF INTENT TO FILE CLAIMS that was sent on October 4<sup>th</sup>, 2013 to the 7 County Commissioners, the Comptroller/Clerk Administrator and Court Administrator. I cc'd Sheriff Gualtieri, Pam Bondi Florida Attorney General and the Department of Financial Regulation on this NOTICE OF INTENT TO FILE CLAIMS, simply for notification purposes, on this October 4, 2013 communication sent via registered email, which stands up in court as evidence. On page 3, #5. Line 3 I specifically name arson as one of the insurance policies the BoCC named itself beneficiary of.

I even told the Department of Financial Regulation Service of Process Unit that if I was found dead in a fire, they would know what happened and by who (as the department was notified as mandated, when anyone files a claim or complaint against government workers). I was informed that if my name should appear in the papers as dead under a fire or any circumstances whatsoever, it would be made very well known. I have also verbally told this to Lieutenants at the Pinellas County Sheriff's Office.

**16 days prior to this November 16, 2013 fire, on October 31, 2013, I had posted the following, now archived chat on Skype:**

**Thursday, October 31, 2013**

[10/31/2013 7:10:42 PM | Edited 7:11:46 PM] proveit88:

Notice: The County here has 3 more days out of the 30 calendar days I granted them, in which to reconvey all property, monies/credit back to the people. These actors have remained silent, up to this point. Should the reconveyance not be carried out, I will do it for them by terminating the Charter and put it into receivership. I have more than one on the inside of the County. Three times prior to yesterday, there have been three discussions on ways to quiet me/off me. The fourth time (last night), was an effort to get someone to burn down the structure where I am. [my emphasis]. It is very important to me that people see and hear about the sequence of events I am going through. I AM STILL HERE. Furthermore, with the documents I have sent out, everyone has every right to take them down to their respective 'County' commissioners and say "This is what was being perpetrated in such and such County, here is the documentation. I want proof that you're not perpetrating the exact same thing therefore I demand all insurance policies you have in Risk Management." I have taken this from nutball conspiracy theory to undeniable FACT. Use this. Use this in as many places in as many ways as you can. And if I am found dead in a fire, or any other mysterious circumstances, suicide or in any way, shape or form, just know it was worth it to me to get this out to good people like you.

And:

[10/31/2013 9:01:30 PM] proveit88:

lol I think it would be hilarious if tomorrow the news was, I was found dead in a house fire!

I encourage all, who wish to know the County insiders motives for pre-warning us, as to why these County Commissioners were so hell bent on setting fire to this place, to read the following information contained within the attached NOTICE OF INTENT TO FILE CLAIMS. They want this brought to light. It was explained in great detail as to what they were doing, how they were doing it, why they were doing it, down to the actual forms they use in which to do it, etc. I am also including the 4 insurance policies which the County Commissioners fraudulently took out, making the following entity, PINELLAS COUNTY BOARD OF COUNTY COMMISSIONERS, LLC the beneficiary of the policies.

Note: This is as absurd as seeing City of Clearwater, LLC or United States of America, LLC! A government entity cannot be a Limited Liability Corporation! The 'Home Rule Charter' is simply a charter overlay, overlaying the existing Pinellas County which has metes and bounds. The 'Home Rule Charter' has no geographic location (as compared to Pinellas County with metes and bounds), as the 'Home Rule Charter' is simply an abstract/concept/overlay fraud whereby its location is at 315 Court Street in Room #601, in a file cabinet. The 'Home Rule Charter' is and always was a fraud at inception because the people were led to believe they were voting on a real government entity when it was nothing but a private for profit corporation. The people were never told when they voted on this sham that ALL property rights would be conveyed over to this fraudulently concealed Public Private Partnership and NONE of their Constitutional rights COULD be conveyed over to this Public Private Partnership and that only a relative few would be benefitting, stealing funds from the public at large. Why was a County Charter overlay so necessary and beneficial to a few? Because a REAL government entity is barred from taking private funds, etc. from organizations like the Bill and Melinda Gates foundation so they fraudulently overthrew our constitutional form of government and formed a private for profit

corporation under the pretext it was still a government entity when it was not. It was void at the inception and it is a void now.

Note: A Public Private Partnership is a 'politically correct' (I am NOT a politician!) way of sugarcoating what it really is: A for profit private Limited Liability Corporation, as evidenced by their sham undocumented, unregistered LLC. There are billions and billions of dollars being fraudulently concealed within the County, and that is evidenced by the CAFR's, PAFR's and TRF's. Look at the Notes to the Financial sections, it's all there for anyone to see. For any who wonder why things have gotten so bad lately, you will see exactly why when you read the NOTICE OF INTENT TO FILE CLAIMS.

The 5<sup>th</sup> document is from the Florida Secretary of State Division of Corporations proving that PINELLAS COUNTY BOARD OF COUNTY COMMISSIONERS, LLC does not exist and has never existed in the State of Florida. The County Commissioners have been stealing funds under the pretext of being a government entity via the people's EIN number, chuting the monies/credits into their own pockets and attempting to launder the rest through this Unregistered, Undocumented LLC.

This screams motive with a capital MOTIVE.

The Fire Investigator has ruled this fire Suspicious. What a surprise! 'Whoever did this not only committed arson and attempted murder upon us, but attempted murder and attempted subsequent arson upon the entire neighborhood and surrounding neighborhoods as well. We know what was perpetrated and believe we know the responsible parties. The laws of averages, the sheer forewarnings from County insiders that specifically disclosed that fire would be used, the fire starting in the only location where there were flammable gas canisters, the rain this very day, the deadline for the NOTICE OF INTENT TO FILE CLAIMS time to cure and correct having lapsed, the showing of the carefully placed multiple fire extinguishers (due to the warnings from County insiders of fire) to the Fire Investigator, showing the Fire Investigator the mass amounts of motion lights we'd purchased directly due to the warnings from County insiders, the first time in years it appeared no one was home, the seriousness of these materials being disclosed to the public at large, and further, the fact that the County Commissioners have insurance policies. To any reasonable man or woman, given the above information, would at the very least, raise profound doubts that this was nothing short of a deliberate arson attack. After all, who benefits? This is a win-win-win situation for a very small group! Follow the money people! People have already been calling this flat out, full blown domestic terrorism. What do you think will be the effect of all Sheriff's, Deputies, police officers finding out how much you profit off their injuries and their deaths! You call it 'Dead Peasants' insurance, don't you? Just like Wal-Mart was caught profiting off Dead Peasants insurance they held secretively (just as you do) of their employees a few years back, when people found out Wal-Mart employees were worth more to Wal-Mart dead than alive, there was an enormous public outcry, the people were horrified and outraged. You lot are a thousand times worse. You benefit off their injuries and deaths and everybody else who ends up dead in this County and you fail to disclose to the survivors the quarter mil/half mil you pocket! You don't share that knowledge or money with the survivor's, do you? Wait til law enforcement finds out that you actually DELIBERATELY pit them against the people, by piling up more and more ordinances, codes, policies etc. whereby making/converting more and more of the people they purport to serve, into 'criminals'. That is blatantly obvious in the Pinellas County Sheriff's Office Operational Overview 2013, page 55 of the 232 page power point, which shows Dispatched Calls versus Self-Initiated Deputy stops. Look at these mind-blowing statistics, clear evidence of the obvious quotas which you call 'station averages' so you can plausibly state that there are no 'quotas' per se, because you simply named it something else. Out of an approximate 921,000 population:

	Arrests	Dispatched	Self-Initiated	All Activity (Total)
2012	12,778	242,474	307,087	549,561
2011	12,929	205,779	252,953	458,732
2010	12,378	231,647	190,240	421,887

Your names: **Kenneth T Welch, Karen Williams Seel, Susan Latvala, John Morroni, Charlie Justice, Janet C. Long, Norman Roche, Ken Burke, Gail Inskeep**, will forever be emblazoned and remembered as the ones who willfully and maliciously failed and refused to stop parasiting off the people, when you were granted 30 calendar days of private opportunity to amend, correct and cure, which was 30 calendar days more than you deserved, due to the unconscionable fraud! This is an undeniable, incontrovertible fact. It is a tragic shame that you would continue stabbing your own species in the back, because you're all on the take. You continued to put filth and industrial waste in the water supply despite great public outcry, knowing that those relative few who wanted it could simply take cheap fluoride pills. You knew full well you had zero authority, jurisdiction or power to do so. I came with peaceful, equitable resolution and was informed that I would be met with a covert, inflammatory response. It seems apparent that you fired the first shot.

Feel free to face your own music for your own actions when the people find out you never had any authority to inundate our water with fluoride, toxic waste, or make any 'legislative', no separation of power 'rulings' on anyone's behalf. You are all fired. With the exception perhaps, of Norm Roche. We were informed by County insiders that the entire group was not involved in the fourth (4<sup>th</sup>) scenario, of fire.

Interestingly enough, the County Commissioners has named themselves beneficiary for all acts of domestic terrorism (you have insurance for domestic terrorism internationally through Lloyd's of London in the UK!). I am now TRIPLING my efforts. Word has it, you really should have listened to the attorney who read the 2013 10 4 768.28 NOTICE OF INTENT TO FILE CLAIMS, who then told you, due to undisputable evidence and documentation revealed within, "You're screwed, give her what she wants", because all I wanted was a reconveyance of all the stolen properties, monies, credits back to ALL the good people this sham County Charter overlay, that at your behest, has continuously and criminally fleeced. Yet instead, I got complete silence from you, but fortunately the insiders were not silent, who passed on word of threats and more specifically, impending fire. As I said on October 31, 2013, (as posted above), I'll say it again. "I AM STILL HERE". A Grand Jury WILL be convened against all criminals, in the alternative, I'll do it myself under private attorney general status. Safe Harbor will be attained/maintained through general withdrawal and exigent trust redeposited as special via the Office of Attorney General. This communication is going viral.
